BHARATH COACHING CENTRE

7th CBSE   Social   Total: 75

Our changing Earth   Time: 3.00hrs

SECTION – A   10 x 1 = 10

1. The internal movement in the earth is called _____.
2. The vibration of earth surface is called_____.
3. A volcanic eruption along a linear crack called_____.
4. Earth movement cause_____ and_____.
5. The magma chamber is located in the_____.
6. Volcanoes and earthquakes one examples of _____forces.
7. The only active volcano in India is _____.
8. The _____ has the maximum number of volcanoes.
9. Haiti is in the_____.
10. An earthquake is strongest at the_____.

SECTION – B   10 X 2 = 20

11. Define seismology.
12. Define types of Volcanoes.
13. Define epic center.
14. Define volcano.
15. Define Rift valley.
16. Define lithospheric plates.
17. What are sand dunes?
18. What is erosion?
19. What are ox-bow lakes?
20. What causes earthquakes?

SECTION – C   10 X 3 = 30

21. How to measurer earthquake?
22. What are earthquake?

23. What are the three types of earthquake waves?
24. Discuss folding & faulting
25. Explain the two types of forces.
26. Differentiate magma and lava.
27. Differentiate vent and crater.
28. Differentiate focus and epicenter
29. Define dormant volcanoes.
30. List the destructive earthquake in India.

SECTION – D   10 X 4 = 40

31. Define well-labeled diagram of volcanoes.
32. Define the importance of volcanoes.
33. Explain the types of volcanoes.
34. Explain the distribution of volcanoes.
35. Explain the types of volcanoes.
36. Define the formation of Block Mountain.
37. Describe the work of the river.
38. Write a short note on the work of sea-waves.
39. Give an account of the work of wind.
40. Imagine if a quake suddenly shook in the middle of the school day, where do you go for safety?
